REPORT NO. FT 110

Imports for consumption include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising for consumption channels.
(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse withdrawals for consumption:

(1) Commodities withdrawn from bonded storage warehouses for consumption.
(2) For statistical purposes, metals, such as cooper, lead, and zinc, withdrawn from bonded smelting and refining warehouses for consumption or for exportation, and commodities such as wheat and petroleum transferred from bonded storage warehouses to bonded manufacturing warehouses for further processing and subsequent withdrawal for exportation are included with warehouse withdrawals for consumption.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the Foreword are obtainable upon request.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

1/ An analysis of the January - September 1948 statistics showed that a substantial portion of these commodities reported from the United Kingdom and Netherlands did not actually originate in those countries, but were transshipments from other countries or were shipped directly from other countries. It is believed that the same situation may apply with respect to the January statistics. (See article on "Adjustments to Import Statistics on Shipments of Aluminum and Lead from United Kingdom, Netherlands and Belgium" in January 1949 Foreign Trade Statistics Notes.)

IMPORT STATISTICS

William C. George

REPORT NO. FT 110

Imports for consumption include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising for consumption channels.
(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse withdrawals for consumption:

(1) Commodities withdrawn from bonded storage warehouses for consumption.
(2) For statistical purposes, metals, such as cooper, lead, and zinc, withdrawn from bonded smelting and refining warehouses for consumption or for exportation, and commodities such as wheat and petroleum transferred from bonded storage warehouses to bonded manufacturing warehouses for further processing and subsequent withdrawal for exportation are included with warehouse withdrawals for consumption.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the Foreword are obtainable upon request.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

Price: Annual subscription (including annual an monthly issues).....$3.00
Monthly and annual issues, each..... 0.25

Subscriptions to these reports should be placed directly with the Department of Commerce Field Offices or with the Superintendent of Documents, Washington 25, D. C.

Regular subscribers of FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information useful to users of foreign trade statistics (changes in type of shipments covered by the current statistics, unusual shipments, problems of valuation, classification, etc.).

A Catalog of Monthly Foreign Trade Statistical Publications listing reports available on a free and paid basis and describing unduplicated information available for reference purposes is available free upon request to the Bureau of the Census.

Commodity Description and Unit of Quantity Schedule A Number	Country of Origin	Net Quantity	Value (Dollars)

1/ An analysis of the January - September 1948 statistics showed that a substantial portion of these commodities reported from the United Kingdom and Netherlands did not actually originate in these countries, but were transshipments from other countries or were shipped directly from other countries. It is believed that the same situation may apply with respect to the February statistics. (See article on "Adjustments to Import Statistics on Shipments of Aluminum and Lead from United Kingdom, Netherlands and Belgium" in January 1949 Foreign Trade Statistics Notes.)

(b) Warehouse withdrawals for consumption:

(1) Commodities withdrawn from bonded storage warehouses for consumption.
(2) For statistical purposes, metals, such as cooper, lead, and zinc, withdrawn from bonded smelting and refining warehouses for consumption or for exportation, and commodities such as wheat and petroleum transferred from bonded storage warehouses to bonded manufacturing warehouses for further processing and subsequent withdrawal for exportation are included with warehouse withdrawals for consumption.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the Foreword are obtainable upon request.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. A separate edition of Schedule C showing the countries adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

1/ An analysis of the January – September 1948 statistics showed that a substantial portion of these commodities reported from the United Kingdom and Netherlands did not actually originate in these countries, but were transshipments from other countries or were shipped directly from other countries. It is believed that the same situation may apply with respect to the March statistics. (See article on "Adjustments to Import Statistics on Shipments of Aluminum and Lead from United Kingdom, Netherlands and Belgium" in January 1949 Foreign Trade Statistics Notes.)

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising for consumption channels.
(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse withdrawals for consumption:

(1) Commodities withdrawn from bonded storage warehouses for consumption.
(2) For statistical purposes, metals, such as cooper, lead, and zinc, withdrawn from bonded smelting and refining warehouses for consumption or for exportation, and commodities such as wheat and petroleum transferred from bonded storage warehouses to bonded manufacturing warehouses for further processing and subsequent withdrawal for exportation are included with warehouse withdrawals for consumption.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the Foreword are obtainable upon request.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

1/ An analysis of the January - September 1948 statistics showed that a substantial portion of these commodities reported from the United Kingdom and Netherlands did not actually originate in these countries, but were transshipments from other countries or were shipped directly from other countries. It is believed that the same situation may apply with respect to the April statistics. (See article on "Adjustments to Import Statistics on Shipments of Aluminum and Lead from United Kingdom, Netherlands and Belgium" in January 1949 Foreign Trade Statistics Notes.)

REPORT NO. FT 110

Imports for consumption include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising for consumption channels.
(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse withdrawals for consumption:

(1) Commodities withdrawn from bonded storage warehouses for consumption.
(2) For statistical purposes, metals, such as cooper, lead, and zinc, withdrawn from bonded smelting and refining warehouses for consumption or for exportation, and commodities such as wheat and petroleum transferred from bonded storage warehouses to bonded manufacturing warehouses for further processing and subsequent withdrawal for exportation are included with warehouse withdrawals for consumption.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the Foreword are obtainable upon request.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.
